Supplement

(SOURCE) On 03/26/2021, Hershberger contacted the police department and reported a fuel leak that drained onto the property where he was working.

(INVESTIGATION) Fuel spill. Sgt Schmidt and Officer Dowd arrived and checked the area for the initial point of the spill or the source of the spill.

The location of the spill appeared to be located south east corner of 741 S Riverbend at the fence that divided the NPT property and the Big country storage units. The substance appears near the fence on the NPT side. It then travels on the Big Country storage side of the fence and follows a drainage ditch east. when the drainage ditch ends the substance spills out into a partially graveled area used for boat, RV and other large vehicle parking/storage.

Photos of the spill were obtained.

While investigating the spill it was discovered a tanker trailer was set up with a temporary foundation with a nozzle for fueling. The tanker has no protection barrier to cat a spill nor was any type of electrical ground located.

Demaree, who is associated with Bonanza Trucking and Earth Hauling was advised of the leak and immediately left his building and checked the fuel trailer. He later advised he believed the cause of the leak was from the large amount of snow that melted and brought oil; and other products to the surface.

Notifications were made to the City of Douglas Code and Compliance, Office, The Department of Environmental Quality (DEQ) and the Converse County Emergency Manager Dagarn,

Responding units Chief Byerly, Sgt Schmidt, Officer Dowd, the Douglas Volunteer fire Department LT Evans with Rescue One.

Photos and video were taken of the spill areas.
